

## Banana Cake with Strawberries

1 cup mashed bananas  
1/4 cup canola oil  
2 eggs  
1/3 cup plain yogurt  
1 1/2 cups all purpose flour  
2 teaspoon baking powder  
1/4 teaspoon vanilla  
2-3 cups strawberries

Preheat oven to 350 degrees. Beat the mashed bananas, oil, eggs, yogurt and vanilla until creamy using the whips in your Bosch bowl. Add flour, baking soda, baking powder and beat well. Spoon the batter into two 8 inch cake pans that have been sprayed with cooking spray. Smooth batter out evenly as it is thick. Bake for 15 to 20 minutes or until toothpick comes out clean. Slice strawberries and spoon over first layer of banana cake. Add second layer of cake and add more sliced strawberries and non-fat whipped topping.
