## HOW TO PLAY!

### OBJECT:

Be the first player to reach the end by moving across the board from square one to the final square.

### RULES:

To take your turn, roll the die again and read the number that you rolled. Pick up your game piece and move forward that number of spaces.

If you land exactly on a square that shows an image of the bottom of a ladder, then you may move your game piece all the way up to the square at the top of the ladder.

If you land exactly at the top of a snake, slide your game piece all the way to the square at the bottom of the snake

The first person to reach the highest square on the board wins. If you roll too high, your piece "bounces" off the last square and moves back. You can only win by rolling the exact number needed to land on the last square.
